WHO/UNICEF Requirement	Amount
Energy density	5.2-5.5 kcal/g
Total energy from protein (50% from milk products)	10-12%
Total energy from Lipids	45-60%
Max. water content	2.5%

Locally Produced RUFT HEBI

• In Bar form

In Paste form

Challenges

Globalization brings new issues to many countries, including Vietnam, raising emerging challenges in nutrition and food safety. Large scale urbanization raises issues related to social structure, food production, and biological environment

Vietnam has been recognized as one among 5 countries badly affected by global climate change.

Population growth has further increased the pressure for development.

-> Double-burden of malnutrition
